1. What are they?

AsciiDoctorJ Panels are a way of creating a panel that is clickable. Now you can create a set of panels that links to various contents, an alternative way of building links.

2. How to use?

AsciiDoctorJ Panels are built using a block processor. SO you will need to create blocks to visualize them. For the most part, the body of the panel is built using a Kotlin DSL.

2.1. First Example

The first type of panels is just panels with a list of panel objects. See example below

```
1 panels {  
2     panel{  
3         link = "http://www.google.com"  
4         label = "Google Search"  
5     }  
6 }
```

Given the above, we will build panels for Google, Apple, Microsoft, Amazon, Netflix

```
1 [panels,"buttons",width="80%"]
2 ----
3 panels {
4   panel {
5     link = "https://www.google.com"
6     label = "Google"
7   }
8   panel {
9     link = "https://www.apple.com"
10    label = "Apple"
11  }
12  panel {
13    link = "https://www.microsoft.com"
14    label = "Microsoft"
15  }
16  panel {
17    link = "https://www.amazon.com"
18    label = "Amazon"
19  }
20  panel {
21    link = "https://www.netflix.com"
22    label = "Netflix"
23  }
24 }
25 ----
```

Table 1. Panel Links

	Label	Link
 This Is Another Google	This Is Another Google	This Is Another Google
 Apple	Apple	Apple
 Microsoft	Microsoft	Microsoft
 Amazon	Amazon	Amazon
 Netflix	Netflix	Netflix

The syntax is pretty small to make a panel of buttons.

3. Round Buttons

Similar to the buttons, we have a round object we can use.

```
[panels,buttons2]
----
panels{
  theme {
    colorMap{
      color("#ff6385")
      color("#36a3eb")
      color("#9966ff")
      color("#ffcf56")
      color("#4bc0c0")
      color("#FDCBF1")
    }
  }
  round {
    link = "https://www.google.com"
    label = "Google"
  }
  round {
    link = "https://www.apple.com"
    label = "Apple"
  }
  round {
    link = "https://www.microsoft.com"
    label = "Microsoft"
  }
  round {
    link = "https://www.amazon.com"
    label = "Amazon"
  }
  round {
    link = "https://www.netflix.com"
    label = "Netflix"
  }
}
----
```

4.1. Themed Example

Same Panel as above but with sorting ascending and different colors.

```
