10. Timeline Builder	18

1. What are they?

AsciiDoctorJ Panels are a way of creating a panel that is clickable. Now you can create a set of panels that links to various contents, an alternative way of building links.

2. How to use?

AsciiDoctorJ Panels are built using a block processor. SO you will need to create blocks to visualize them. For the most part, the body of the panel is built using a Kotlin DSL.

2.1. First Example

The first type of panels is just panels with a list of panel objects. See example below

```
1 panels {  
2     panel{  
3         link = "http://www.google.com"  
4         label = "Google Search"  
5     }  
6 }
```

Given the above, we will build panels for Google, Apple, Microsoft, Amazon, Netflix

```
1 [panels,"buttons",width="80%"]
2 ----
3 panels {
4   theme {
5     colorMap {
6       color("#a1f196")
7       color("#165578")
8       color("#7d746c")
9       color("#2442d1")
10      color("#c0adef")
11      color("#4d2666")
12      color("#fbb103")
13      color("#1eb3f1")
14      color("#4f49eb")
15      color("#f3b304")
16      color("#e693ce")
17      color("#a6b23b")
18      color("#ad217f")
19      color("#2fb6ee")
20      color("#81392e")
21      color("#071e9b")
22      color("#675b01")
23      color("#ed6b19")
24      color("#a02cae")
25      color("#88683f")
26    }
27  }
28  panel {
29    link = "https://www.google.com"
30    label = "Google"
31  }
32  panel {
33    link = "https://www.apple.com"
34    label = "Apple"
35  }
36  panel {
37    link = "https://www.microsoft.com"
38    label = "Microsoft"
39  }
40  panel {
41    link = "https://www.amazon.com"
42    label = "Amazon"
43  }
44  panel {
45    link = "https://www.netflix.com"
46    label = "Netflix"
47  }
48 }
```

Table 1. Panel Links

	Label	Link
This Is Another Google	This Is Another Google	This Is Another Google
Apple	Apple	Apple
Microsoft	Microsoft	Microsoft
Amazon	Amazon	Amazon
Netflix	Netflix	Netflix

The syntax is pretty small to make a panel of buttons.

3. Round Buttons

Similar to the buttons, we have a round object we can use.

```
[panels,buttons2]
----
panels{
  theme {
    colorMap{
      color("#ff6385")
      color("#36a3eb")
      color("#9966ff")
      color("#ffcf56")
      color("#4bc0c0")
      color("#FDCBF1")
    }
  }
  round {
    link = "https://www.google.com"
    label = "Google"
  }
  round {
    link = "https://www.apple.com"
    label = "Apple"
  }
  round {
    link = "https://www.microsoft.com"
    label = "Microsoft"
  }
  round {
    link = "https://www.amazon.com"
```

```

    label = "Amazon"
}
round {
    link = "https://www.netflix.com"
    label = "Netflix"
}
}
----
```

Table 2. Panel Links

	Label	Link
Google	Google	Google
Apple	Apple	Apple
Microsoft	Microsoft	Microsoft
Amazon	Amazon	Amazon
Netflix	Netflix	Netflix

4. Theming

TIP | New Attributes added, dropShadow & font

Table 3. Theme Guide

Item	Attribute	Value
layout	columns	<i>optional</i> , default: 3, max recommended 6

Item	Attribute	Value
	groupBy	default Grouping.TITLE, others → .Grouping.TYPE, Grouping.AUTHOR, Grouping.DATE
	groupOrder	<i>optional</i> default Grouping.ASCENDING, others → Grouping.DECENDING
		<pre> theme { layout { columns = 4 groupBy = Grouping.TITLE groupOrder = GroupingOrder.ASCENDING } } </pre>
colorMap	color	<i>optional</i>
		<pre> colorMap{ color("#a1f196") color("#165578") color("#7d746c") color("#2442d1") color("#c0adef") color("#4d2666") color("#fbb103") color("#1eb3f1") color("#4f49eb") color("#f3b304") color("#e693ce") color("#a6b23b") color("#ad217f") color("#2fb6ee") color("#81392e") color("#071e9b") color("#675b01") color("#ed6b19") color("#a02cae") color("#88683f") color("#FDCBF1") } </pre>
legendOn	legend	boolean, <i>default true</i>
newWin		boolean, <i>default true</i>
dropShadow		number 0..9, <i>default 1</i>

Item	Attribute	Value
font		set of font to use <pre>font = font { color = "#000000" font = "Arial, Helvetica, sans-serif" size = "9pt" decoration = "underline" }</pre>

4.1. Themed Example

Same Panel as above but with sorting ascending and different colors.

```

1 [panels,"round2"]
2 ----
3 panels {
4   theme {
5     layout {
6       columns = 4
7       groupBy = Grouping.TITLE
8       groupOrder = GroupingOrder.ASCENDING
9     }
10    font = font {
11      color = "#ffffff"
12    }
13    dropShadow = 2
14    colorMap{
15      color("#ff6385")
16      color("#36a3eb")
17      color("#9966ff")
18      color("#ffcf56")
19      color("#4bc0c0")
20      color("#FDCBF1")
21    }
22    newWin = false
23  }
24  panel {
25    link = "https://www.google.com"
26    label = "Google"
27  }
28  panel {
29    link = "https://www.apple.com"
30    label = "Apple"
31  }
32  panel {
33    link = "https://www.microsoft.com"
34    label = "Microsoft"

```

```

35   }
36   panel {
37       link = "https://www.amazon.com"
38       label = "Amazon"
39   }
40   panel {
41       link = "https://www.netflix.com"
42       label = "Netflix"
43   }
44 }
45 ----

```

Table 4. Panel Links

	Label	Link
	Google	Google
	Apple	Apple
	Microsoft	Microsoft
	Amazon	Amazon
	Netflix	Netflix

5. Small Panels

More informational panels can be created with small cards

```

1 panels {
2     theme {
3         layout {
4             columns=4
5             groupOrder = GroupingOrder.ASCENDING
6         }
7         font = font {
8             color = "#000000"
9         }
10        colorMap{
11            color("#ebb3d1")
12        }
13        legendOn = false
14        gradientStyle = DarkTheme
15    }
16    slim {
17        link = "https://www.google.com"
18        label = "Google"
19        type = "Advertising"
20        description = "Google is is an American multinational technology company

```

```

    that specializes in Internet-related services and products "
21     author("Sergey Brin")
22     author("Larry Page")

9.5. JSON Schema

Link to schema for the JSON used for creating a release strategy.

<https://docops.io/extension/schemas/release-strategy-schema.json>

10. Timeline Builder

Table 11. Demo timeline Builder by docops.io

Date	Event
July 23rd, 2023	DocOps extension Server releases a new feature, Timeline Maker for asciidoctorj. With a simple text markup block you can create very powerful timeline images. Enjoy!
August 15th, 2023	DocOps.io revamping website with updated documentation. All our work will be updated with latest documentation for Panels, for extension server are the various plug-ing for asciidoctorj.
September 1st, 2023	DocOps.io will begin work on revamping the asciidoctorj converter. with the asciidoctorj 3.0.0 release coming we will need to migrate custom plug-ins to the new version of the extensions as they will bring braking changes.
October 18th, 2023	Time to reimagine the future. Is it possible to write a lexer parser for custom language?
November 16th, 2023	Another year been on this earth. Time to celebrate. Good times.
December 11th, 2023	Annual start of vacation, time to relax and plugin the controller.
