

DocOps.io AsciiDoctorJ Panels

Steve D Roach

Table of Contents

1. What are they?	1
2. How to use?	1
2.1. First Example	1
3. Round Buttons	6
4. Theming	11
4.1. Themed Example	12
5. Small Panels	18
6. Large Panels	25
7. Generate Color Map Utility	33
8. Badges/Shield	34
8.1. Syntax	34

1. What are they?

AsciiDoctorJ Panels are a way of creating a panel that is clickable. Now you can create a set of panels that links to various contents, an alternative way of building links.

2. How to use?

AsciiDoctorJ Panels are built using a block processor. SO you will need to create blocks to visualize them. For the most part, the body of the panel is built using a Kotlin DSL.

2.1. First Example

The first type of panels is just panels with a list of panel objects. See example below

```
1 panels {
2     panel{
3         link = "http://www.google.com"
4         label = "Google Search"
5     }
6 }
```

Given the above, we will build panels for Google, Apple, Microsoft, Amazon, Netflix

```
1 [panels,"buttons"]
2 ----
3 panels {
4     panel {
5         link = "https://www.google.com"
6         label = "Google"
7     }
8     panel {
9         link = "https://www.apple.com"
10        label = "Apple"
11    }
12    panel {
13        link = "https://www.microsoft.com"
14        label = "Microsoft"
15    }
16    panel {
17        link = "https://www.amazon.com"
18        label = "Amazon"
19    }
20    panel {
21        link = "https://www.netflix.com"
22        label = "Netflix"
23    }
24 }
```

```

The syntax is pretty small to make a panel of buttons.

3. Round Buttons

Similar to the buttons we have a round object we can use.

```
[panels,buttons2]
----
panels{
  theme {
    colorMap{
      color("#ff6385")
      color("#36a3eb")
      color("#9966ff")
      color("#ffcf56")
      color("#4bc0c0")
      color("#FDCBF1")
    }
  }
}
round {
```

```

    link = "https://www.google.com"
    label = "Google"
}
round {
    link = "https://www.apple.com"
    label = "Apple"
}
round {
    link = "https://www.microsoft.com"
    label = "Microsoft"
}
round {
    link = "https://www.amazon.com"
    label = "Amazon"
}
round {
    link = "https://www.netflix.com"
    label = "Netflix"
}
}
----

```

```

4. Theming

TIP New Attributes added, dropShadow & font

Table 3. Theme Guide

Item	Attribute	Value
layout	columns	<i>optional</i> , default: 3, max recommended 6
	groupBy	default Grouping.TITLE, others → .Grouping.TYPE, Grouping.AUTHOR, Grouping.DATE
	groupOrder	<i>optional</i> default Grouping.ASCENDING, others → Grouping.DECENDING

Item	Attribute	Value
		<pre> theme { layout { columns = 4 groupBy = Grouping.TITLE groupOrder = GroupingOrder.ASCENDING } } </pre>
colorMap	color	<i>optional</i>
		<pre> colorMap{ color("#ff6385") color("#36a3eb") color("#9966ff") color("#ffcf56") color("#4bc0c0") color("#FDCBF1") } </pre>
legendOn	legend	boolean, <i>default true</i>
newWin		boolean, <i>default true</i>
dropShadow		number 0..9, <i>default 1</i>
font		set of font to use <pre> font = font { color = "#000000" font = "Arial, Helvetica, sans-serif" size = "9pt" decoration = "underline" } </pre>

4.1. Themed Example

Same Panel as above but with sorting ascending and different colors.

```

1 [panels,"round2"]
2 ----
3 panels {
4   theme {
5     layout {
6       columns = 4
7       groupBy = Grouping.TITLE
8       groupOrder = GroupingOrder.ASCENDING
9     }

```

```

10     font = font {
11         color = "#ffffff"
12     }
13     dropShadow = 2
14     colorMap{

Table 6. Slim Cards Guide

Item	Attribute	Notes
slim	type	A way to categorize the card by in case you would like to group or sort by, see the Theme table for sorting and grouping
	description	used as the hover over information describing the card
	author	list of "author" to the link provided
	date	date to display content attributed to link

6. Large Panels

The alternative to Slim Panel is Large Panels where the description is now displayed on the card

```

1 [panels,"large"]
2 ----
3 panels {
4   theme {
5     layout {
6       columns = 3
7     }

Table 8. Large Cards Guide

Item	Attribute	Notes
large	type	A way to categorize the card by in case you would like to group or sort by, see the Theme table for sorting and grouping
	description	more information on the content behind the link
	date	date to display content attributed to link

7. Generate Color Map Utility

```

<div class='exampleblock'>
  <div class='content'>
    <div class='literalblock'>
      <div class='content' id="colormap"></div>
    </div>
  </div>
</div>
<button name="Generate" value="Generate" onclick="genColors();">Create Color
Palette</button>
<input type="number" id="points" name="points" value="20" step="1">
<script>
function getColor(){
  return hslToHex(360 * Math.random(), (25 + 70 * Math.random()) , (75 + 10 *
Math.random()) );
}
function hslToHex(h, s, l) {
  l /= 100;
  const a = s * Math.min(l, 1 - l) / 100;
  const f = n => {
    const k = (n + h / 30) % 12;
    const color = l - a * Math.max(Math.min(k - 3, 9 - k, 1), -1);
    return Math.round(255 * color).toString(16).padStart(2, '0'); // convert to Hex and
prefix "0" if needed
  };
  return `#${f(0)}${f(8)}${f(4)}`;
}
function genColors() {
  let str = "colorMap {\n";
  let elem = document.getElementById("colormap");
  elem.innerHTML = '';
  var pts = document.getElementById("points");
  var count = pts.value;
  for( let i = count; i--;) {
    let item = document.createElement('div');
    var color = document.createElement('div');
    let clr = getColor();
    item.style.cssText = `
      display:inline-block;
      padding: 2em;

```

```

        margin:5px;
        border-radius:50%;
        background: ${clr};
    \
    item.innerText = clr;
    str += '        color(\"'+ clr + '\")\n';
    elem.appendChild(item);
}
str += "}"
color.innerText = str
var ppre = document.createElement("pre");
var pcode = document.createElement("code");
pcode.className = 'language-kotlin';
ppre.appendChild(pcode);
pcode.innerText = str;

elem.appendChild(ppre);
}
</script>

```

- A simple Utility to generate a pastel themed the colormap for your convenience.

8. Badges/Shield

8.1. Syntax

```

[badge]
----
Badges|Are|https://www.google.com|RED|Blue|
Cool|Aren't They?|https://www.yahoo.com|BLUE|ORANGE|C
----

```

Table 9. Pipe Delimited Values

Label	Message	Url		Label Color	Message Color	Icon
Label for the Badge	Message For Badge	Optional Url		Color for label, e.g. Red	Color for message, e.g. #ffccb9	SimpleIcon name, eg C
		TIP	Still needs pipe character with empty url
